uTest mobile app

This year (2020) uTest released its official mobile app for Android and iOS devices. The uTest mobile app allows your uTest experience to become more flexible and enables testing on the go.

Features of the app

- Receive and accept test cycle invitations on-the-go
- Claim slots and test cases
- Execute test cases and report issues
- Receive push notifications about test cycle invitations and in-cycle announcements
- Perform basic user profile maintenance to keep your account up to date

We are constantly improving the application and adding new features. To make sure you don't miss the latest improvements, **keep your automatic updates turned on**.

Note: You cannot access uTest chat or community from the mobile app. You can also check this page for some useful info about the app.
